Profiling Tutorials and Let's Build Sequence

<https://www.devdays.com/november-2020/lets-build-a-fhir-specification/>

Learning Objectives Tutorial/Let's Build

Learn:

- The purpose of FHIR Shorthand
- How it compares to other methods of creating Implementation Guides
- Basic grammar

Build:

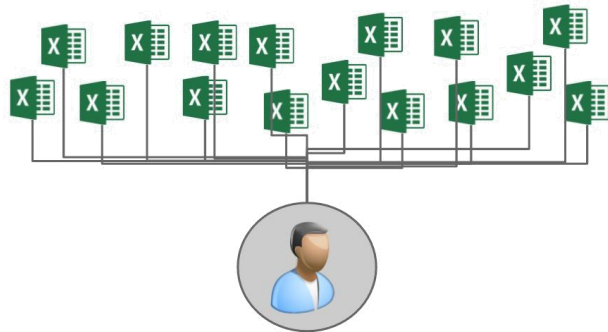

- Your first profile in FHIR Shorthand
- Use SUSHI, the FHIR Shorthand compiler

What is FHIR Shorthand (FSH)?

- A **language** for profiling and implementation guide (IG) creation
- Part of the FHIR family of standards, currently Standard for Trial Use (STU 1)
- Seamlessly integrated with the HL7 FHIR IG Publisher
- Open source and free to use

Profiling Approaches

Spreadsheet

 phasing out

Point-and-Click

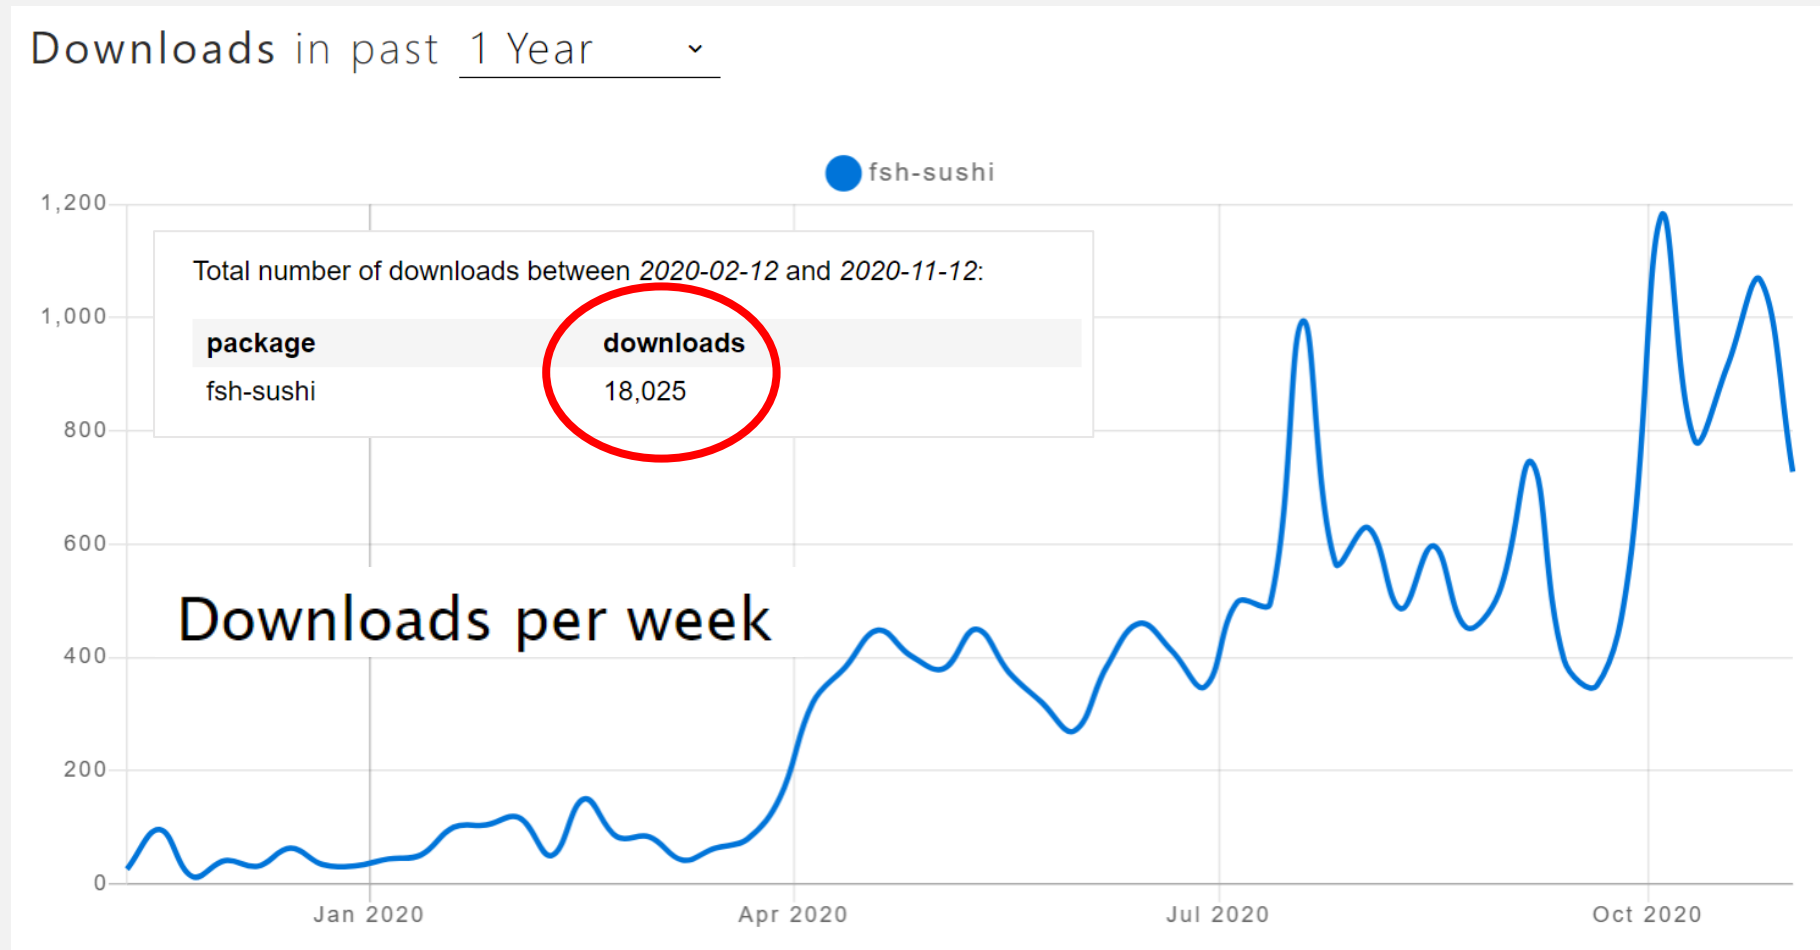

Command

The FSH Family of Tools

- [FSH Language Specification](#) -- HL7 FHIR Standard
- [School of FSH](#) -- web site with documentation, tools, examples
- [FSH On line](#) -- interactive FHIR Shorthand
- [Go FSH](#) -- convert existing implementation guides into FSH (beta)
- [SUSHI Init](#) -- instantly set up a new project
- [VS Code extension](#) -- code highlighter for VS Code editor
- [SUSHI](#) -- compile FSH into FHIR Artifacts
- [FSH Finder](#) -- web crawler to find FSH projects

FSH Consumption is Rising

FSH Finder 	
This is a list of GitHub repositories that contain FSH code. Please see the README for more details on how this works. Last refreshed about a day ago.	
1	US Core Implementation Guide HL7 / US-Core updated a day ago [CI build] 1.0
2	US Core Implementation Guide HL7 / US-Core-R4 updated a day ago [CI build] 1.0
3	devdays-covid19-vaccine costateixeira / devdays-covid19-vaccine updated 2 days ago [CI build] 1.0
4	WHO Case Reporting for COVID-19 Surveillance openhie / covid-ig updated 3 days ago [CI build] 1.0
5	riziv-inami h17-be / riziv-inami updated 3 days ago [CI build] 1.0
6	Subscriptions R5 Backport HL7 / fhir-subscription-backport-ig updated 4 days ago [CI build] 1.0
7	HL7 FHIR Implementation Guide: Clinical Genomics Reporting Release 1 - US Realm STU1 HL7 / genomics-reporting updated 5 days ago [CI build] 1.0
8	HL7 FHIR Implementation Guide: minimal Common Oncology Data Elements (mCODE) Release 1 - US Realm STU1 HL7 / fhir-mCODE-ig updated 7 days ago [CI build] 1.0
9	LoincIvdTestCodeMapping HL7 / livd updated 11 days ago [CI build] 1.0
10	h17-be-fhir-medication h17-be / h17-be-fhir-medication updated 18 days ago [CI build] 1.0
11	fsh-icare standardhealth / fsh-icare updated 2 months ago [CI build] 1.0
12	Primary Care Practice-to-Practice aehrc / primary-care-data-technical updated a day ago [CI build] 0.x

43	HL7® FHIR® New Zealand Base Implementation Guide HL7NZ / nzbase updated 4 months ago [CI build] 0.x

“ FSH is a joy! ”

David Hay,
ClinFHIR, blogger

“ The ability to create
implementation guides, value
sets, code systems, and any
sample resource you might
ever want in this simple
language is simply fantastic. ”

Keith Boone,
Audacious Inquiry

“ FSH has legs ”

Grahame Grieve
FHIR Product Director

“ An immensely
useful project ”

Richard Kavanagh,
Board Member HL7 UK

“ I have to admit "Go FSH" ”
fills me with joy -
whatever it is the app
does

Lloyd McKenzie,
HL7 Canada

Let's Dive into FSH

<https://www.freeimages.com/photo/diver-1381076>

Name	Flags	Card.	Type	Description & Constraints
MedicationRequest		0..*	MedicationRequest	Ordering of medication for patient or group
status	S	1..1	code	active on-hold cancelled completed entered-in-error stopped draft unknown Binding: medicationrequest Status (required)
intent	S	1..1	code	proposal plan order original-order reflex-order filler-order instance-order option Binding: medicationRequest Intent (required)
reported[x]	S	0..1		Reported rather than primary record
reportedBoolean			boolean	
reportedReference			Reference(US Core Patient Profile US Core Practitioner Profile US Core Organization Profile)	
medication[x]	S	1..1		Medication to be taken Binding: US Core Medication Codes (RxNorm) (extensible)
medicationCodeableConcept			CodeableConcept	
medicationReference			Reference(US Core Medication Profile)	
subject	S	1..1	Reference(US Core Patient Profile)	Who or group medication request is for
encounter	S	0..1	Reference(Encounter)	Encounter created as part of encounter/admission/stay
authoredOn	S	1..1	dateTime	When request was initially authored
requester	S	1..1	Reference(US Core Practitioner Profile US Core Organization Profile US Core Patient Profile)	Who/What requested the Request
dosageInstruction	S	0..*	Dosage	How the medication should be taken
text	S	0..1	string	Free text dosage instructions e.g. SIG

Typical profile:

- Must support
- Cardinality
- Data type
- Value Set Binding

Text Editor for .fsh Files

- Any text editor will do, but we suggest Visual Studio Code (<https://code.visualstudio.com/download>)
- Load any **.fsh** file, and VS Code will prompt to install the extension:

```
Profile: MedicationRequestFSH
Parent: MedicationRequest
Id: medication-request-fsh
Title: "Medication Requestion FSH"
Description: "Defines US constraints on MedicationRequest using FSH"
```

Declaration and Keywords

```
* status and intent and reported[x] and medication[x] and subject and encounter and authoredOn and
requester and dosageInstruction and dosageInstruction.text MS
```

```
* requester 1..1
* authoredOn 1..1
```

Rules

MustSupport and Cardinality

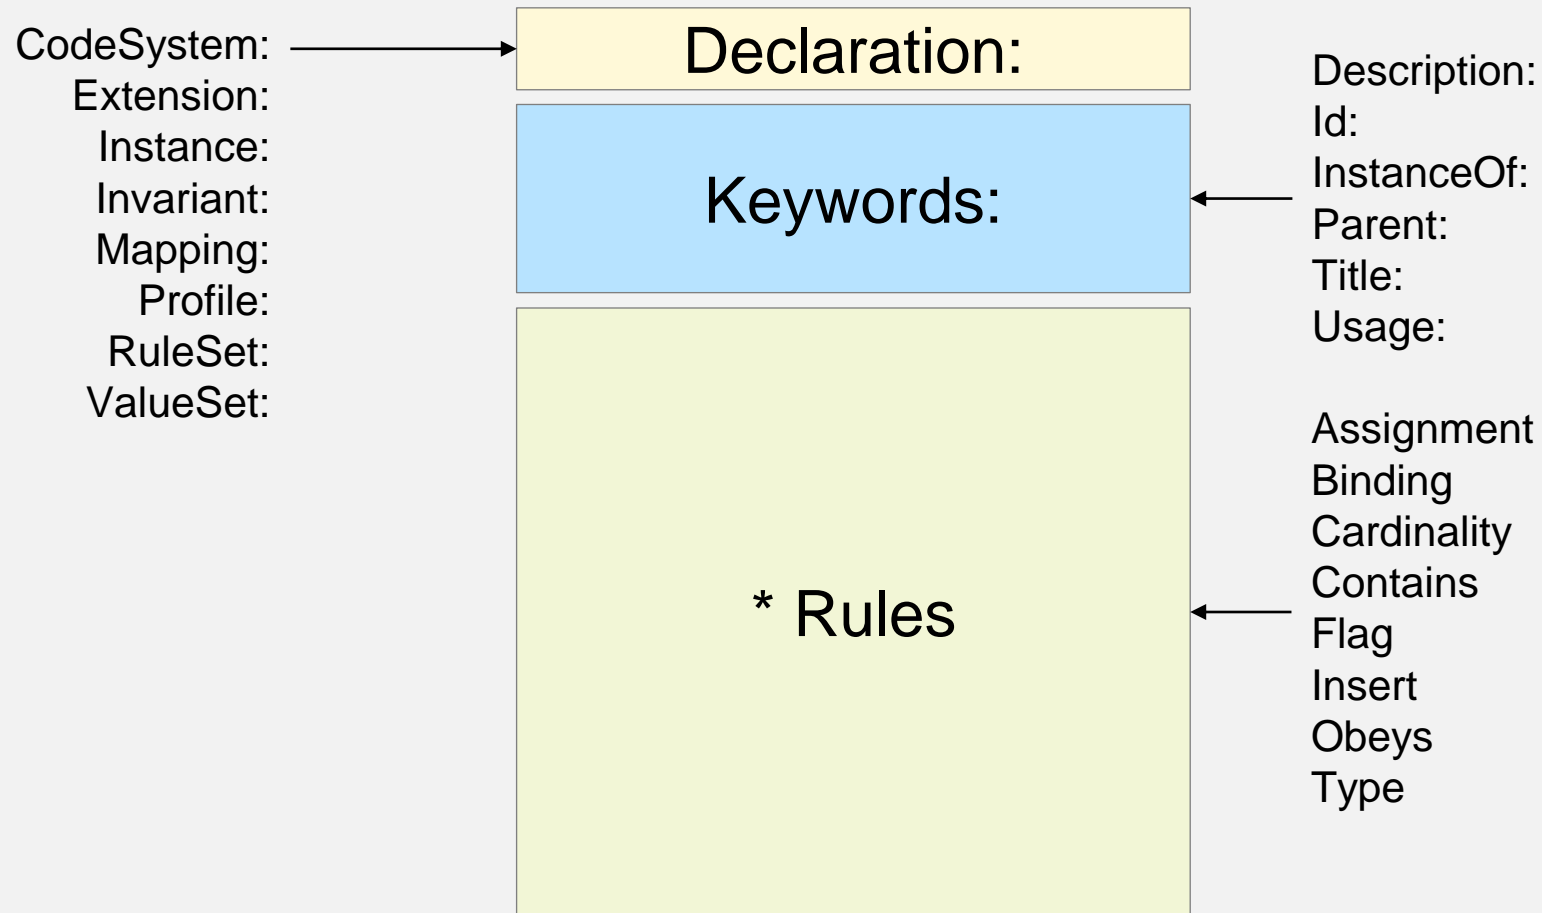

```
* reported[x] only boolean or Reference(us-core-patient or us-core-practitioner or us-core-organization)
* medication[x] only CodeableConcept or Reference(us-core-medication)
* subject only Reference(us-core-patient)
* requester only Reference(us-core-practitioner or us-core-organization or us-core-patient)
```

Data Type Choices

```
* medicationCodeableConcept from us-core-medication-codes (extensible)
```

Value Set Binding

Anatomy of a FSH Item:

Add an Instance (Example):

```

Alias: RXNORM = http://www.nlm.nih.gov/research/umls/rxnorm
Instance: MedicationRequestExample1
InstanceOf: MedicationRequestFSH
Title: "Medication Request Example 1"
Description: "Nizatidine 15 MG/ML Oral Solution [Axid]"
* status = #active
* intent = #order
* medicationCodeableConcept = RXNORM#582620 "Nizatidine 15 MG/ML Oral Solution [Axid]"
* subject = Reference(Patient/example)
* subject.display = "Amy Shaw"
* authoredOn = "2008-04-05"
* requester = Reference(Practitioner/practitioner-1)
* requester.display = "Ronald Bone, MD"
* dosageInstruction.text = "10 ml bid"
* dosageInstruction.timing.repeat.boundsPeriod.start = "2008-04-05"
* dispenseRequest.numberOfRepeatsAllowed = 1
* dispenseRequest.quantity = 480 'mL'
* dispenseRequest.expectedSupplyDuration = 30 'd'
    
```

Global Alias

Declaration and Keywords

CodeableConcept

Reference

Rules

Nested path

Quantity

Define an Extension

```

Extension: TreatmentIntent
Id: treatment-intent
Title: "Treatment Intent"
Description: "The purpose of a treatment."
* ^context.type = #element
* ^context.expression = "MedicationRequest"
* value[x] from TreatmentIntentVS (required)
    
```

Declaration and
and
Metadata (care
Keywords
Rules

Add it to profile with "extension contains" rule:

```
* extension contains TreatmentIntent named treatmentIntent 0..1 MS
```

Define the TreatmentIntentVS value set:

```
Alias: SCT = http://snomed.info/sct
```

```
ValueSet: TreatmentIntentVS
Id: treatment-intent-vs
Title: "Treatment Intent Value Set"
Description: "The purpose of a treatment."
```

Declaration
and
Keywords

```
* ^copyright = "This value set includes content from SNOMED CT, which is copyright © 2002+ International Health Terminology Standards Development Organisation (IHTSDO), and distributed by agreement between IHTSDO and HL7. Implementer use of SNOMED CT is not covered by this agreement"
```

Rules

```
* include SCT#373808002 "Curative - procedure intent"
* include SCT#363676003 "Palliative - procedure intent"
* include SCT#399707004 "Supportive - procedure intent"
```

Include a single
code in VS

Intensional definition of a Value Set:

```
ValueSet: TherapeuticIntentVS  
Id: therapeutic-intent-vs  
Title: "Therapeutic Intent Value Set"  
Description: "Demonstration of an intensional value set"  
  
* include codes from system SCT where concept is-a #262202000 "Therapeutic intent"
```

```

Alias: RXNORM = http://www.nlm.nih.gov/research/umls/rxnorm
Alias: SCT = http://snomed.info/sct

Profile: USCoreMedicationRequestFSH
Parent: MedicationRequest
Id: us-core-medicationrequest
Title: "US Core Medication Requestion"
Description: "Defines US constraints on MedicationRequest"
* status and intent and reported[x] and medication[x] and subject and encounter and authoredOn and requester and dosageInstruction and dosageInstruction.text MS
* requester 1..1
* authoredOn 1..1
* reported[x] only boolean or Reference(us-core-patient or us-core-practitioner or us-core-organization)
* medication[x] only CodeableConcept or Reference(us-core-medication)
* subject only Reference(us-core-patient)
* requester only Reference(us-core-practitioner or us-core-organization or us-core-patient)
* medicationCodeableConcept from us-core-medication-codes (extensible)
* extension contains TreatmentIntent named treatmentIntent 0..1 MS

Instance: MedicationRequestExample1
InstanceOf: USCoreMedicationRequestFSH
Title: "Medication Request Example 1"
Description: "Nizatidine 15 MG/ML Oral Solution [Axiid]"
* status = #active
* intent = #order
* medicationCodeableConcept = RXNORM#582620 "Nizatidine 15 MG/ML Oral Solution [Axiid]"
* subject = Reference(Patient/example)
* subject.display = "Amy Shaw"
* authoredOn = "2008-04-05"
* requester = Reference(Practitioner/practitioner-1)
* requester.display = "Ronald Bone, MD"

This was a turtle disaster. 1 Error 0 Warnings

Running the IG Publisher (IGP)

If you don't have them, obtain the scripts `_genonce` and `_updatePublisher` from the sample-ig project (<https://github.com/FHIR/sample-ig/archive/master.zip>) and copy them to your root directory

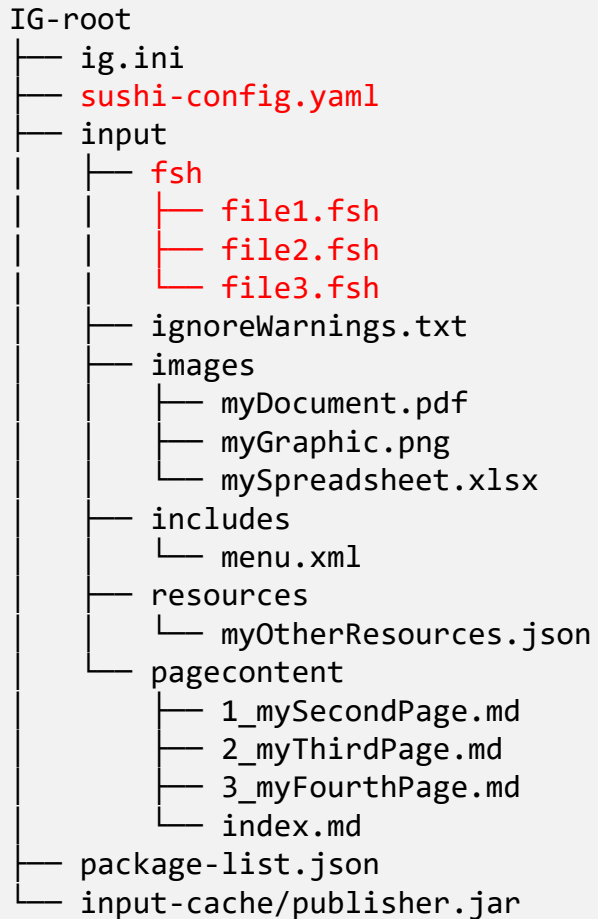

- See <https://fshschool.org/docs/sushi/running/#downloading-the-ig-publisher-scripts>

1. Open a command window
2. Run `_updatePublisher`
3. Run `_genonce`

SUSHI will run automatically if the `./input/fsh` directory is found

Directory Structure

normal IG project structure + FSH

run IG publisher
(runs SUSHI
automatically)

The Resulting IG

48 lines of FSH:

- 1 Profile
- 1 Instance
- 1 Extension
- 1 Value set

The screenshot displays the HL7 FHIR Developer Tools interface for configuring a profile. It is divided into several sections:

- Summary:** Shows details for the ValueSet: TreatmentIntentVS, including its defining URL, version (0.1.0), name, title, status, and definition.
- References:** Lists references to other FSH resources like TreatmentIntent.
- 2.3.1.1 Logical Definition (CL):** Shows the logical definition of the profile, including a table of codes and their display names.

Code	Display
373808002	Curative - procedure intent
363676003	Palliative - procedure intent
399707004	Supportive - procedure intent
- 2.3.1.2 Expansion:** Shows the expansion of the value set based on SNOMED CT codes.
- 2.1.1 Resource Profile: Medication Request FSH:** Shows the profile's defining URL, version, name, title, status, and definition. It also lists source resources (XML, JSON, Turtle).
- 2.1.1.1 Formal Views of Profile Content:** Provides a detailed view of the profile's structure, including a tree diagram and a table of elements.

Name	Flags	Card.	Type	Description & Constraints
MedicationRequest		0..*	MedicationRequest	Ordering of medication for patient or group
status	S	1..1	code	active on-hold cancelled completed entered-in-error stopped draft unknown
intent	S	1..1	code	proposal plan order original-order reflex-order filler-order instance-order option
reported[x]	S	0..1		Reported rather than primary record
reportedBoolean			boolean	
reportedReference			Reference(US Core Patient Profile US Core Practitioner Profile US Core Organization Profile)	
medication[x]	S	1..1		Medication to be taken Slice: Unordered, Open by type:\$this
medicationCodeableConcept			CodeableConcept	
medicationReference			Reference(US Core Medication Profile)	
medicationCodeableConcept		0..1	CodeableConcept	Medication to be taken Binding: US Core Medication Codes (RxNorm) (extensible)
subject	S	1..1	Reference(US Core Patient Profile)	Who or group medication request is for
encounter	S	0..1	Reference(Encounter)	Encounter created as part of encounter/admission/stay
authoredOn	S	1..1	dateTime	When request was initially authored
requester	S	1..1	Reference(US Core Practitioner Profile US Core Organization Profile US Core Patient Profile)	Who/What requested the Request

That's great, Mark, but I already have an IG...

Using GoFSH to Convert an Existing IG (beta)

First install gofsh: `npm install -g gofsh`

1. Navigate to the directory above where the StructureDefinitions are located
2. At the command prompt, type: `gofsh`

Results will be appear in `/gofsh` subdirectory

```

gofsh > ≡ resources.fsh
1 Profile: MedicationRequestFSH
2 Parent: MedicationRequest
3 Id: medication-request-fsh
4 Title: "Medication Request FSH"
5 Description: "Defines US constraints on MedicationRequest using FSH"
6 * ^text.status = #extensions
7 * ^version = "0.1.0"
8 * ^status = #active
9 * ^date = "2020-11-15T10:12:09-05:00"
10 * status MS
11 * intent MS
12 * reported[x] only boolean or Reference(http://hl7.org/fhir/us/core/StructureDefinition/us-core-patient or http://hl7.org/fhir/us/core/StructureDefinition/us-core-practitioner or http://hl7.org/fhir/us/core/StructureDefinition/us-core-organization)
13 * reported[x] MS
14 * medication[x] only CodeableConcept or Reference(http://hl7.org/fhir/us/core/StructureDefinition/us-core-medication)
15 * medication[x] MS
16 * medicationCodeableConcept 0..1
17 * medicationCodeableConcept only CodeableConcept
18 * medicationCodeableConcept from http://hl7.org/fhir/us/core/ValueSet/us-core-medication-codes (extensible)
19 * subject only Reference(http://hl7.org/fhir/us/core/StructureDefinition/us-core-patient)
